

ATTENTION

HEAVY VEHICLE AIR BRAKE SERVICE INSTRUCTORS

Introducing:

The most comprehensive and effective **AIR BRAKE TEACHING RESOURCES** ever developed for Professional Heavy Vehicle Air Brake Service Instructors.

Air Brake™

Interactive CE

CLASSROOM EDITION Level 1

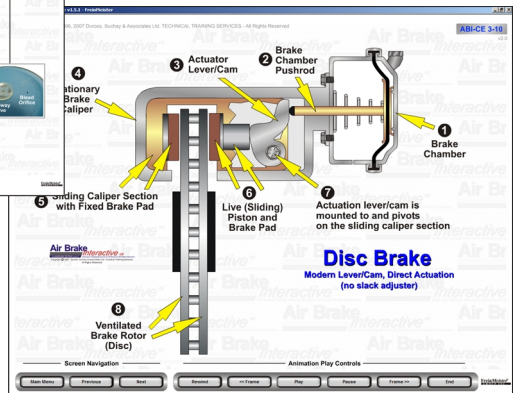

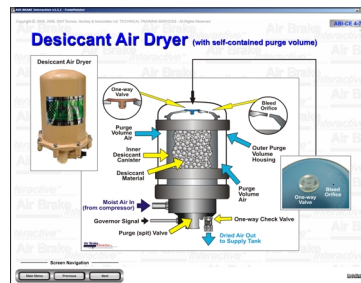

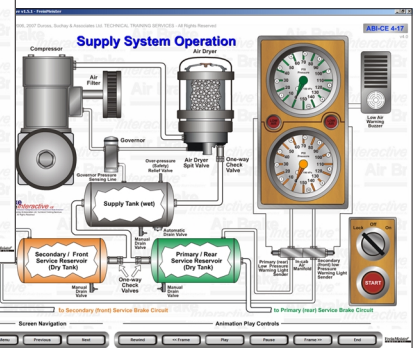

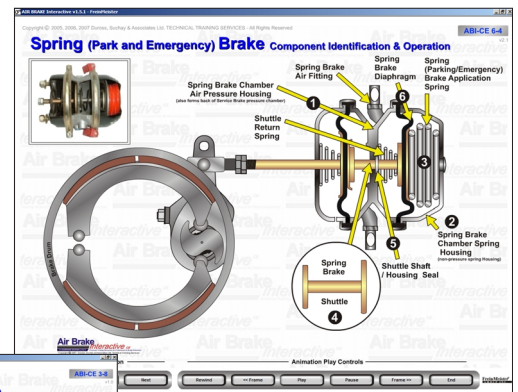

Enhanced Training Resources for Professional Air Brake Instructors

FOR INSTRUCTORS, TEACHING entry level and intermediate level air brake service mechanics and/or providing advanced air brake training for commercial drivers.

The AIR BRAKE Interactive Package

AIR BRAKE *Interactive* consists of a highly detailed, full color, 12-module, 350 page "Instructor's Reference and Presentation Guide", supported by a state-of-the-art "CD-ROM Multimedia Presentation". The multimedia presentation contains 46 narrated technical/mechanical animations and over 75 additional static technical visuals detailing the operation of a typical modern heavy vehicle air brake system.

What can YOU do with AIR BRAKE *Interactive*?

AIR BRAKE *Interactive* Classroom Edition Level 1 is the ideal teaching resource for instructing entry level and intermediate level air brake service technicians. You can present the entire program, or you can simply choose which modules or specific subjects are best suited to your training requirements.

AIR BRAKE *Interactive* 'Content and Visuals'

AIR BRAKE *Interactive* IS NOT a re-assembly of ages-old air brake training material that has been around for decades. AIR BRAKE *Interactive* employs ALL NEW and ORIGINAL MATERIAL. Its content, structure, system diagrams, technical animations and illustrations have been carefully designed and created by a team of training development specialists to make your job as a trainer easier and most effective. With AIR BRAKE *Interactive*, you will provide your students the MOST thorough air brake education possible anywhere!

Visual Learning - A Powerful Teaching Tool

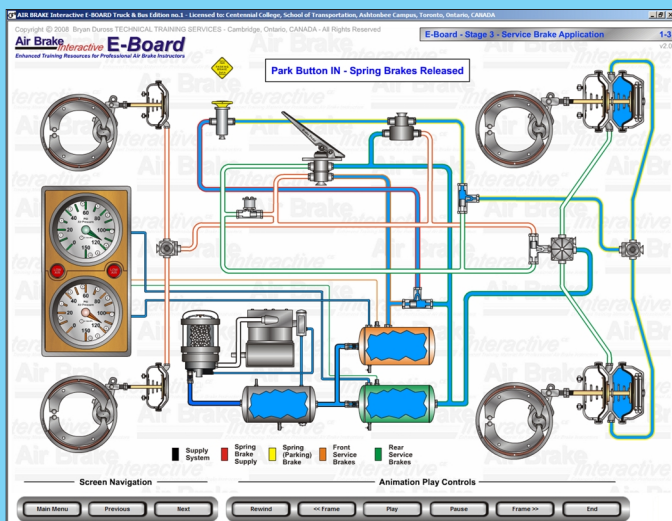

The key to AIR BRAKE *Interactive*'s exceptional effectiveness is "visual learning". Highly detailed technical/mechanical animations and technical visuals make the normally invisible operation of an air brake system's components and circuits visible and very easily understood. In short, WE MAKE the invisible VISIBLE! The result is vastly improved student comprehension and retention, faster learning, a consistent training message and better informed service technicians and drivers.

Comprehensive, Accurate and Consistent - Every Time!

AIR BRAKE *Interactive* is a complete, presentation-ready, training package that has been carefully structured to deliver a progressive learning experience. The Instructor's Reference and Presentation Guide provides presenters with a wealth of detailed reference information and a point-by-point guide for presenting their program. Combined with the program's powerful multimedia support animations and visuals, this ensures a thorough, accurate and consistent presentation by every instructor, every time!

Are YOU considering purchasing a conventional "air brake board"?

We can design, custom build and computer-animate a fully functional multimedia electronic air brake board to meet your precise training needs and specifications, at a fraction of the cost of a conventional air brake board!

For further information, or to arrange for an on-line **live demonstration** of "AIR BRAKE *Interactive*" (ABI), please contact:
